Codex as Your AI Work Agent

- We use Codex
- You also can use others
- Login to the Codex

Build a project folder

- Open in the folder

First task — make a webpage

- > Please create a webpage for the Snake game.
- > The snake is rainbow-colored.

Second task — make a table

- Start with a low-risk job: research something, then have Codex organize it into a spreadsheet. This teaches research, file creation, and editing in one go.
- > Research the new features of Codex desktop and organize them into an Excel table. Columns: feature name, purpose, who it is for, use case, notes. Save the file in this project folder.
- > Remove the 'notes' column, and rewrite 'who it is for' in plainer words.

Exercise 01: First webpage

- Please create a personal webpage that includes your student ID and name.
- Upload the image of the webpage to portal
